## OmROn

## Ultra Subminiature Basic Switch

## Subminiature Size Ideal for PCB

## Mounting ( $12.8 \times 6.5 \times 5.8(W \times H \times D)$ )

■ Incorporating a snapping mechanism made with two highly precise split springs that ensures a long durability.
■ Using Insertion molded terminals and a two-stage bottom with different levels prevent flux penetration.

■ Self-clinching PCB, right-angled, left-angled, and solder terminals are available.

■ Meets a wide range of applications, including home appliances, audio equipment, office machines, and communications equipment.

RoHS Compliant

## Ordering Information

## - Model Number Legend

## D2F-

1. Ratings

None: General loads
01: Micro loads (0.1 A at 30 VDC)
2. Maximum Operating Force

None: $1.47 \mathrm{~N}\{150 \mathrm{gf}\}$
F: $\quad 0.74 \mathrm{~N}\{75 \mathrm{gf}\}$
Note:These values are for the pin plunger models.
3. Actuator

None: Pin plunger
L: Hinge lever
L2: Hinge roller lever
L3: $\quad$ Simulated roller lever (R1.3)
L30: Simulated roller lever (R2.5)
4. Terminals

None: PCB terminals/straight terminals
-T: Self-clinching PCB terminals
-A: Right-angled PCB terminals
-A1: Left-angled PCB terminals
-D3: Solder terminals
-D: Compact solder terminals

## - List of Models

| Actuator | General loadsOF max. (see note) | General loads |  | Micro loads |  |

Note: The OF values shown in the table are for the pin plunger models.

## Specifications

## - Ratings

| Item |  | D2F models |  | D2F-01 models |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| OF max. |  | $\begin{gathered} \text { General-purpose } \\ 1.47 \mathrm{~N}\{150 \mathrm{gf}\} \end{gathered}$ | $\begin{gathered} \text { Low operating } \\ 0.74 \mathrm{~N}\{75 \mathrm{gf}\} \end{gathered}$ | $\begin{gathered} \text { General-purpose } \\ 1.47 \mathrm{~N}\{150 \mathrm{gf}\} \end{gathered}$ | $\begin{gathered} \text { Low operating } \\ 0.74 \mathrm{~N}\{75 \mathrm{gf}\} \end{gathered}$ |
|  |  | Resistive load |  |  |  |
| Rated voltage | 125 VAC | 3 A | 1 A | --- |  |
|  | 30 VDC | 2 A | 0.5 A | 0.1 A |  |

Note: 1. Consult your OMRON sales representative before using the Switch with inductive or motor loads.
2. The ratings values apply under the following test conditions:

Ambient temperature: $20 \pm 2^{\circ} \mathrm{C}$
Ambient humidity: $65 \pm 5 \%$
Operating frequency: 30 operations $/ \mathrm{min}$

## - Characteristics

| Operating speed | 1 mm to $500 \mathrm{~mm} / \mathrm{s}$ (pin plunger models) |
| :---: | :---: |
| Operating frequency | Mechanical: 200 operations $/ \mathrm{min} \max$. <br> Electrical: 30 operations $/ \mathrm{min} \max$. |
| Insulation resistance | $100 \mathrm{M} \Omega \mathrm{min}$. (at 500 VDC ) |
| Contact resistance (initial value) | D2F models: $30 \mathrm{~m} \Omega$ max. D2F-F models: $50 \mathrm{~m} \Omega$ max. D2F-01 models: $100 \mathrm{~m} \Omega$ max. |
| Dielectric strength (see note 2) | 600 VAC, $50 / 60 \mathrm{~Hz}$ for 1 min between terminals of the same polarity $1,500 \mathrm{VAC}, 50 / 60 \mathrm{~Hz}$ for 1 min between current-carrying metal parts and ground, and between each terminal and non-current-carrying metal part |
| Vibration resistance (see note 3) | Malfunction: 10 to $55 \mathrm{~Hz}, 1.5-\mathrm{mm}$ double amplitude |
| Shock resistance (see note 3) | Destruction: $1,000 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 100G\} max. <br> Malfunction: $300 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 30G\} max. |
| Durability (see note 4) | Mechanical: $1,000,000$ operations $\min .(60$ operations $/ \mathrm{min})$ <br> Electrical: 30,000 operations $\mathrm{min} .(30$ operations $/ \mathrm{min})$ |
| Degree of protection | IEC IP40 |
| Degree of protection against electric shock | Class I |
| Proof tracking index (PTI) | 175 |
| Ambient operating temperature | $-25^{\circ} \mathrm{C}$ to $65^{\circ} \mathrm{C}$ (at ambient humidity of $60 \%$ max.) (with no icing or condensation) |
| Ambient operating humidity | $85 \%$ max. (for $5^{\circ} \mathrm{C}$ to $35^{\circ} \mathrm{C}$ ) |
| Weight | Approx. 0.5 g (pin plunger models) |

Note: 1. The data given above are initial values.
2. The dielectric strength shown in the table indicates a value for models with a Separator.
3. For the pin plunger models, the values are at the free position and total travel position. For the lever models, they are at the total travel position.
4. For testing conditions, consult your OMRON sales representative.

## - Approved Standards

Consult your OMRON sales representative for specific models with standard approvals.

UL1054 (File No. 41515)/
CSA C22.2 No. 55 (LR21642)

| Rated <br> voltage | D2F (general- <br> purpose) | D2F (low oper- <br> ating force) | D2F-01 |

## Precautions

Refer to General Information.

## - Cautions

## Terminal Connection

When soldering a lead wire to the terminal, first insert the lead wire conductor into the terminal hole and then perform soldering.
Make sure that the capacity of the soldering iron is 30 W maximum and that the temperature of the soldering iron tip is approximately $300^{\circ} \mathrm{C}$. ( $350^{\circ} \mathrm{C}$ maximum.) Complete the soldering within 3 s .
Using a switch with improper soldering may result in abnormal heating, possibly resulting in burn.
Applying a soldering iron for more than 3 s or using one that is rated at more than 30 W may deteriorate the switch characteristics.
When using automatic soldering baths, we recommend soldering at $260 \pm 5^{\circ} \mathrm{C}$ within 5 seconds. Make sure that the liquid surface of the solder does not flow over the edge of the board.

## ■ Correct Use

## Mounting

Turn OFF the power supply before mounting or removing the Switch, wiring, or performing maintenance or inspection. Failure to do so may result in electric shock or burning.
Use M2 mounting screws with plane washers or spring washers to securely mount the Switch. Tighten the screws to a torque of 0.08 to $0.1 \mathrm{~N} \cdot \mathrm{~m}\{0.8$ to $1 \mathrm{kgf} \cdot \mathrm{cm}\}$.

Mount the Switch onto a flat surface. Mounting on an uneven surface may cause deformation of the Switch, resulting in faulty operation or breakage in the housing.

## Using Micro Loads

Using a model for ordinary loads to open or close the contact of a micro load circuit may result in faulty contact. Use models that operate in the following range. However, even when using micro load models within the operating range shown below, if inrush current occurs when the contact is opened or closed, it may increase contact wear and so decrease durability. Therefore, insert a contact protection circuit where necessary.
The minimum applicable load is the N -level reference value. This value indicates the malfunction reference level for the reliability level of $60 \%$ ( $\lambda 60$ ). The equation, $\lambda 60=0.5 \times 10^{-6} /$ operations indicates that the estimated malfunction rate is less than 1/ $2,000,000$ operations with a reliability level of $60 \%$.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.
To convert millimeters into inches, multiply by 0.03937 . To convert grams into ounces, multiply by 0.03527 .
